## Digital Toolbox for Historians: Basics in Digital History

Seminar with Dr. Ina Serif, Basel - 09.03. / 13.04 / 04.05.2023

As historians in a digital age, we all work with digital tools - often without being aware of it or realizing their full potential. The course shows PhD students the different possibilities and potentials of working with digital tools. It raises awareness that these tools can only be used productively in combination with scientific methods and questions, and teaches the corresponding skills. At the same time, the fundamentals of data collection, processing and storage will be taught, for qualitative as well as quantitative work with sources and data.

Wann: Donnerstag, 09.03./13.04/04.05.2023, 09:00 - 13:00 Uhr

Wo: Departement Geschichte, Hirschgässlein 21, Seminarraum 1
